Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-63 and 79-90, drawn to an optical pickup apparatus for reading

information on a rotating optical medium, classified in class 369, subclass

128.

II. Claims 64-78, drawn to an apparatus for reading information on information

plane of an optical medium, classified in class 369, subclass 47.28.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a

single combination. The subcombinations are distinct from each other if they are shown to

be separately usable. In the instant case, invention II has separate utility such as without

require an operation of leading and lagging electrical signals as required in the invention I.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired

a separate status in the art as shown by their different classification, restriction for

examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include

an election of the invention to be examined even though the requirement be traversed (37

CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bach Q. Vuong whose telephone number is (703) 305-7355. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Korzuch can be reached on (703) 305-6137. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
